

Retail Signage

Jarob, Inc. works with major retailers all over the U.S., assisting in any or all phases of a project, from engineering to fabrication and installation. We'll work with your design team or a team you've contracted with to bring merchandising concepts to life. All the images shown here were fabricated and installed by Jarob for a Top 10 retailer.

- Large, four-sided hanging units are constructed of a digitally printed acrylic face over a lightweight framework. Light cascading through the units makes for a standout display.
- Four-sided check stand lanterns are digitally printed on translucent white acrylic and hung from a metal frame system. Backlighting makes these units easily seen from all over the store.

- Department headers are constructed for easy installation and for easy identification by customers. Jarob worked with the book vendor to integrate their display into the retailer's overall design concept.

- • Lightweight end-cap displays are constructed for easy installation and digitally printed for a clear, bright and eye-catching display.

- • Banners like this one are digitally printed on single- or double-faced banner material and can be ceiling-hung or mounted to a wall. Cutout and wall-mounted department identity lettering is constructed of a lightweight material, making it cost effective and easy to install.
- • Large department images are digitally printed and mounted in a way that allows a hold-off from the wall, making the graphics stand out.
